

SAHIL DAGAR

AWS Cloud/DevOps Engineering Professional

Results-driven **AWS Cloud Engineer and DevOps professional** with **nearly 2 years** of hands-on experience in designing and managing cloud infrastructure, focused to drive operational efficiency and system reliability.

Profile Summary

- AWS Cloud Engineer and DevOps professional with **hands-on experience** in designing, managing, and optimizing **cloud infrastructure** for performance, reliability, and cost efficiency.
- Skilled in administering optimization, **zero-downtime migrations, infrastructure automation, and enforcing Zero Trust security** across production environments.
- Led the design and implementation of **cloud-native and microservices architectures**, ensuring seamless integration and alignment with business and client requirements.
- Delivered **56% reduction in monthly cloud costs** by migrating a microservices application to a more efficient architecture through optimization and right-sizing.
- Strong expertise in **automation, resource optimization, and Infrastructure as Code (IaC)** using **Terraform**, streamlining multi-cloud deployments and infrastructure management.
- Implemented a **comprehensive observability stack**, improving incident response and driving a **40% increase in system reliability and performance metrics**.
- Hands-on experience with **DevOps practices**, including **CI/CD pipelines**, automation, and monitoring to enhance operational stability across cloud environments.
- In-depth knowledge of **cloud security principles**, including **IAM policies and Zero Trust architecture**, ensuring compliance with industry best practices and data protection standards.
- Proven collaborator and team lead, actively **mentoring junior engineers**, fostering a culture of continuous improvement while pursuing advanced learning in **Kubernetes and Jenkins**.

Organizational Experience

- Sept'24-Present**
Mindrops Solutions Pvt. Ltd. as AWS Cloud Engineer | New Delhi
- Highlights:**
- Architecting and maintaining cloud-native infrastructure across **AWS (EC2, VPC, IAM, S3, RDS) with integrations on DigitalOcean and Azure**, ensuring high availability and scalability.
 - Orchestrating containerized workloads using **Docker and Portainer**, implementing **Nginx and Apache reverse proxies** for seamless application delivery and performance optimization.
 - Designing and managing **CI/CD pipelines via GitHub Actions across 65+ repositories**, enabling automated deployments for React, Node.js, and PHP applications.
 - Building an advanced observability stack **using CloudWatch, Prometheus, Grafana, and Elasticsearch**, improving incident response time by 40% and strengthening SLA compliance.
 - Implementing automation using **Bash and Python for deployments**, backups, and scheduled tasks, along with automated disaster recovery, enabling daily database backups and weekly S3 archival.
 - Managed Amazon **RDS (MySQL & PostgreSQL)** with HA failover, executing a zero-downtime upgrade from **MySQL 5.6 to 8.4** and improving query performance by 40%.
 - Achieved major cost savings by **consolidating microservices onto EC2**, reducing **AWS spend by 56%**.
 - Implemented **robust cloud security controls** including **Zero Trust, IAM least privilege, network segmentation**, and **DNS/CDN governance**, supported by regular audits for **compliance and cost optimization**.

New Delhi, 110073, India

Technical Skills

Cloud Platforms

Docker & Portainer

Automation & CI/CD Tools

Security Frameworks

Linux & Windows Server

Terraform & AWS CloudFormation

Areas of Exposure

Cloud Infrastructure Management

Microservices Architecture

Continuous Integration and Deployment

Disaster Recovery Planning

Performance Tuning and Optimization

Incident Response Planning

IT Operations Automation

Security Compliance and Governance

Agile Project Management

Projects

Cloud Architecture Migration & Cost Optimisation
Highlights:

- Reverse-engineered an undocumented AWS infrastructure by auditing the AWS Console and running services, creating a complete architectural understanding without existing diagrams or runbooks.
- Migrated a microservices stack (ECS, Lambda, OpenSearch, RabbitMQ, EFS) to a Terraform-managed EC2 architecture, achieving a 56% reduction in monthly AWS costs.

RDS Upgrade & Performance Optimisation
Highlights:

- Performed a zero-downtime Amazon RDS MySQL upgrade from v5.6 to v8.4 using a read-replica promotion strategy with staged validation and rollback safeguards.
- Improved database performance by ~40%, enhancing stability and strengthening SLA compliance post-upgrade.

Multi-Server Consolidation, Dockerization & Backup Automation
Highlights:

- Migrated 65+ applications from distributed DigitalOcean droplets into a two-server architecture (staging and production), dockerizing 8 legacy apps and automating deployments via Portainer and GitHub Actions CI/CD, resulting in ~80% infrastructure cost savings.
- Implemented automated disaster recovery, archiving static content weekly to S3 and performing daily MySQL/PostgreSQL backups using Bash and AWS CLI, ensuring data resilience and operational continuity.

Certifications

- AWS Certified Solutions Architect – Associate, Amazon Web Services, Mar’26
- AWS Certified Cloud Practitioner – Associate, Amazon Web Services, Feb’26

Personal Details

Date of Birth: 3rd June 2002
Languages Known: English & Hindi

Soft Skills

- Risk Management
- Critical Thinking
- Team Building
- Attention to Detail
- Negotiation
- Conflict Management

Education

2023	Bachelor of Computer Applications, Jagannath University, New Delhi
