

Sahil Dagar

AWS Cloud Engineer & DevOps Engineer

New Delhi, India | +91-9643782988 | Sahildagar3602@gmail.com | linkedin.com/in/sahil-dagar2002

Summary

AWS-certified Cloud and DevOps Engineer with 1+ year of hands-on experience architecting multi-cloud infrastructure, containerized microservices, CI/CD pipelines, and observability stacks across high-availability production environments. Adept at cloud cost optimisation, zero-downtime migrations, infrastructure automation, and enforcing Zero Trust security across production environments.

Experience

Mindrops

AWS Cloud Engineer

New Delhi

Sep 2024 – Present

- Architect, provision, and maintain cloud-native and microservices infrastructure on **AWS** (EC2, VPC, IAM, S3, RDS, Route 53), **DigitalOcean**, and **Azure**
- Orchestrate containerized workloads using **Docker** and **Portainer** with reverse proxy configuration via **Nginx** and **Apache**
- Design and maintain **GitHub Actions** CI/CD pipeline automation across **65+ repositories** for staging and production deployments covering React, Node.js, and PHP applications
- Implement end-to-end observability using **CloudWatch**, **Prometheus**, **Grafana**, **Loki**, **Promtail**, **Elasticsearch**, **Monit**, and **Uptime Kuma** for proactive incident management, root cause analysis, and SLA compliance
- Administer **Amazon RDS (MySQL)** and self-hosted **MySQL** and **PostgreSQL** instances for performance tuning, high-availability (HA) failover, and disaster recovery planning
- Develop and maintain **Bash** and **Python** automation scripts for deployments, backups, scheduled jobs, and Linux server administration across **Ubuntu**, **CentOS**, and **Amazon Linux**
- Enforce **Zero Trust** and cloud security principles: **IAM least-privilege**, **SSL/TLS**, network segmentation, security group hardening, and access control policies
- Administer **DNS**, **CDN**, and domain configurations; drive cloud cost optimisation through regular audits, rightsizing, and resource governance

Key Projects

Cloud Architecture Migration & Cost Optimisation

- Inherited an undocumented infrastructure with no diagrams or runbooks; reverse-engineered the entire setup by auditing **AWS Console** and running services to map the existing architecture
- Migrated a microservices-based application (ECS, Lambda, OpenSearch, RabbitMQ, EFS) to a consolidated **EC2**-based architecture using **Terraform** as Infrastructure as Code, achieving **56% reduction** in monthly AWS costs

RDS Upgrade & Performance Optimisation

- Executed a zero-downtime **Amazon RDS MySQL** upgrade from **v5.6 to v8.4** using a read-replica promotion strategy with staged validation and snapshot-based rollback safeguards
- Post-upgrade, the client reported an approximately **40% improvement in query performance**, along with enhanced database stability and SLA compliance

Multi-Server Consolidation, Dockerization & Backup Automation

- Consolidated 65+ applications from distributed **DigitalOcean** droplets into a two-server architecture – one for staging and non-critical apps, one dedicated to critical production workloads
- Dockerized **8 legacy applications** (PHP, Node.js, Python) and managed containers via **Portainer** with **GitHub Actions** CI/CD pipelines, achieving approximately **80% reduction** in infrastructure costs
- Implemented automated disaster recovery – weekly **Bash scripts** archive static content to **S3** and daily scripts dump all **MySQL** and **PostgreSQL** databases, compress, and upload securely via **AWS CLI**

Skills & Technologies

Cloud Platforms: AWS, DigitalOcean, Microsoft Azure, GCP

AWS Services: EC2, S3, RDS, VPC, IAM, Auto Scaling, Load Balancers, Route 53, SES, Lambda, ECS, ECR, CloudWatch, CloudFront, OpenSearch, ElastiCache

Infrastructure as Code: Terraform, AWS CloudFormation

Containerization: Docker, Portainer.io, Nginx, Apache

Automation & CI/CD: GitHub Actions, Pipeline Automation, Bash Scripting, Python, Shell Scripting

Operating Systems: Linux (Ubuntu, CentOS, Amazon Linux), Windows Server

Monitoring & Logging: CloudWatch, Prometheus, Grafana, Loki, Promtail, Elasticsearch, Monit, Uptime Kuma

Security & Networking: Zero Trust Security, IAM, SSL/TLS, Network Segmentation, DNS, CDN

Others: Git/GitHub, Linux Administration, Microservices, DevOps, Cloud Security, Incident Response, Root Cause Analysis

Education & Certifications

Jagannath University

Bachelor of Computer Applications

New Delhi

2020 – 2023

AWS Certified Solutions Architect – Associate

Amazon Web Services

Mar 2026

AWS Certified Cloud Practitioner

Amazon Web Services

Feb 2026
